

## SPECTRUM LASERS INC

Thank you for purchasing a Spectralase Diode Laser. This laser is the end result of years of scientific development and many manual handcrafted steps. Your laser has been calibrated to 99% energy accuracy and does not require any maintenance.

Please review the Owners Manual, Procedure Guides, and Videos that are accessible at <http://www.spectralasedental.com>. The Laser Training page sign-in is member.

This laser is safe and easy to operate if we schedule a 45-60 minute Zoom training. You may schedule this conference by texting, calling me directly at 925-788-3954 or by email [bcobley@msn.com](mailto:bcobley@msn.com). We can send you a recorded Zoom training via We Transfer if it is more convenient for you.

### **Laser Hand piece**

Never remove the nut from the hand piece. Inside the nut is a small pressure fitting the keeps the fiber from slipping. The hand piece and metal tips are autoclavable. The clear tip for pain management is not autoclavable.

### **Laser safety glasses**

Avoid using strong solutions or alcohol to clean. Use mild solutions you would use for expensive sunglasses. Replacement cost is \$199 per pair.

### **S-1 Plus Set-Up**

### **SPECTRUM LASERS INC REDUCES PAPER USE**

Spectralase diode lasers are no longer shipped with owners manuals, procedure guides, and marketing material. Since the 1960s, world consumption of paper has quadrupled and use of printing paper has increased six-fold. Half of the trees cut commercially around the world end up in paper products. Yet much of this paper use is wasteful and unnecessary and it is linked to forest destruction, pollution and climate change emissions. The EPA asks us to consider whether a document needs to be printed at all, and if not, only publish on-line. They suggest the majority of publications and communications may not in fact need to exist on paper. Spectrum believes that the quality of life will not suffer if we use less paper and has accepted the challenge from the EPA to reduce paper use at the source.

### **LIMITED WARRANTY 3-year warranty**

Spectrum warrants Spectralase Diode Lasers to be free from defects in materials and workmanship for a period of thirty six months from the date of shipment, except for consumables and accessories and will conduct repairs at no charge except for return shipping.

This warranty only covers product issues caused by defects in material or workmanship during ordinary consumer use; it does not cover product issues caused by any other reason, including but not limited to acts of God, modifications, improper testing, mishandling, misuse, neglect, adjustments, alterations to the products, improper operation contrary to current instructions relating to installation, maintenance or operation, or contrary to industry standards relating to acceptable input power. This warranty does not cover damage caused by unplugging the power cord or foot pedal cable while the laser is still turned on. This damage is caused by neglect and repairs are the responsibility of the owner.

Please do not hesitate to contact me with any questions you may have. We want you to be completely satisfied with your laser and use it on a regular basis.

Bob Cobley, President, Spectrum Lasers Inc. 925-788-3954, [bcobley@spectralasedental.com](mailto:bcobley@spectralasedental.com)
